

Migration and Management Solutions for Exchange 2007

Quest Software® has migrated more than 10 million mailboxes to Exchange and continues this tradition with its commitment to securely and reliably migrate users over to the new Exchange 2007 platform. In addition to our excellence in migration, Quest leads in Exchange management solutions with managing over 10 million mailboxes—offering everything organizations need to manage storage, ensure availability and improve performance. Quest is the leader in the Exchange migration and management market providing comprehensive solutions for organizations that wish to optimally run their messaging platform.

Quest Software will help organizations migrate to Exchange 2007 from any major e-mail platforms and provide management solutions that maximize their investment in Exchange - before, during and after the migration.

Quest is committed to having the following products ready when Exchange 2007 is Released-to-Market (RTM) by Microsoft. At the present time, Microsoft has not publicly announced an RTM date but it is anticipated that the release will happen in late Q4 2006 or early Q1 2007.

Quest Software Exchange 2007 Support Matrix

All information subject to change
